

Coalition America Continues to see Significant Growth in EDI Connectivity with its Clients

Atlanta, GA, December 9, 2005... Coalition America, Inc. (CAI), the leader in medical claim savings, has seen continued significant growth in EDI connectivity with its clients in 2005.

“At the end of 2004 we were connected with approximately 40 clients and received nearly 80% of our claim volume through some form of electronic data interchange (EDI)” said Fred Christian, Chief Information Office. “As of the end of 2005 we have experienced an increase in EDI transmitted claims to nearly 90% through 63 clients. This continued rapid growth is a result of the payors’ mounting interest in technology that can streamline their repricing and adjudication processes, and the fact that CAI offers multiple solutions including HIPAA compliant formats, proprietary formats, and paperless solutions,” said Christian.

An increasing number of the EDI connections are being facilitated through strategic relationships with adjudication software companies. These organizations have created modifications to enhance EDI connectivity to CAI, including Acclamation Systems (LuminX), Advanced Medical Pricing Solutions and Eldorado Computing, Inc., Hi-Tech Health, TriZetto and WLT Software.
